Profile

A highly motivated and detail-oriented Front-End Developer in building dynamic, responsive, and user-centric web applications. Proficient in modern JavaScript (ES6+), React, Angular and a variety of frontend tools and libraries, with a proven track record of developing scalable and maintainable codebases. Skilled in transforming designs into functional and accessible interfaces, ensuring cross-browser compatibility and performance optimization. Passionate about creating seamless user experiences and collaborating within Agile teams to deliver high-quality, impactful software solutions. Always eager to learn and adopt emerging technologies to stay ahead in the ever- evolving front-end landscape.

Skills

Professional Experience

2025 – Present

Frontend Developer, Elsoft tech hub

As a team member at **Elsoft Tech Hub**, an IT solutions company, I played an integral role in developing and delivering responsive, user-centric web and mobile applications. Collaborating with a talented team of developers, I contributed to all aspects of front-end development, leveraging modern technologies such as **Next.js**, **React**, and **React Native** to build scalable and maintainable solutions.

At Elsoft, I worked on several key projects, including a **Student Management Application built with Next.js**, where I helped design and implement dashboards, authentication systems, and performance optimized pages for seamless academic record management. I also contributed to the development of a **Church Management Application using React**, focusing on building intuitive user interfaces and dynamic components to simplify membership and event management. Additionally, I was involved in creating a **Real Estate Application with React Native**, ensuring a responsive, mobile first experience for property listings and client interactions.

During my time at Elsoft Tech Hub, I also undertook a freelance project where I independently developed an **Escrow Transaction Dashboard for Vendyz**. Building the project from scratch, I designed and implemented the interface to provide a responsive, user friendly, and visually intuitive experience for managing transactions efficiently.

These experiences collectively strengthened my ability to deliver **end to end, high quality solutions** from concept to deployment while enhancing my technical expertise, collaboration, and project management skills.

2024 – 2024

Frontend Developer, *Vegeel technology limited*

As part of a collaborative team of developers, I contributed to the development of a cybersecurity compliance web application using React. I worked closely with back-end developers to ensure efficient data flow and seamless integration between the front-end and back-end systems. This experience significantly enhanced my React skills, particularly in front-end integration, and deepened my understanding of building robust and scalable web applications in a collaborative environment.

My primary responsibilities included:

- Collaborating with teammates during code reviews, debugging API response issues, and optimizing the API integration for performance.
- Developing user authentication features using React, integrating login, signup, and role-based access controls.
- Ensuring responsive and accessible UI designs that worked seamlessly across different devices and browsers.
- Writing reusable and modular components in React to simplify code maintenance and scalability.

2023 – 2024

Web developer instructor, *Bafuto institute of information and technology*

As a web developer instructor at Bafuto Institute of Information and Technology, I was responsible for mentoring and guiding students in the fundamentals and advanced concepts of web development. I designed and delivered engaging lessons on topics such as HTML, CSS, JavaScript, React, and modern web development practices.

Through hands-on projects and interactive sessions, I helped students build real-world applications, ensuring they gained practical experience and a deep understanding of frontend technologies. This role allowed me to share my passion for web development, foster learning, and inspire the next generation of developers.

Education

2024 – Present

BS’c English Language, *Lagos State University*

2023 – 2024

Computer science, *Bafuto institute of Information and technology*

2018 – 2023

SSCE, *The Gods Will School*
