Profile

Highly motivated and detail oriented **Software Developer** with hands on experience building **scalable, responsive, and user centric web applications**. Proficient in **JavaScript (ES6+), TypeScript, React, React Native (Expo), Angular, Next.js, and Tailwind CSS**. Strong backend experience with **Node.js, Express, and Nest.js**, including RESTful API development and integration.

Skilled in **frontend architecture**, converting UI/UX designs into **accessible, high-performance interfaces**, ensuring **cross-browser compatibility**, and optimizing application performance. Experienced in **Agile/Scrum environments**, version control with **Git**, and collaborative development workflows.

Currently advancing skills in **C#, .NET, and ASP.NET** to expand full stack capabilities. Committed to continuous learning and delivering high-quality software solutions.

Skills

React

React Native

Next JS

TypeScript

Angular

JavaScript (ES6+)

Redux / Zustand / Context-API

Version Control (Git, GitHub, GitLab)

Tailwind Css/ Material UI

Firebase

Vercel

Netlify

Authentication (Jwt, OAuth)

Restful Api

Unit Testing (Jest / Mocha)

Effective time management

Teaching and communication

Express

Nest JS

C#

.NET

ASP.NET

Professional Experience

01/2025 – Present

Software Developer, Elsoft tech hub

Lagos, Nigeria

- Architected and developed a **Student Management System** using **Next.js**, building interactive dashboards that streamlined academic record management for multiple users and improved data accessibility.
- Built a **cross-platform Real Estate mobile application** using **React Native**, delivering a mobile-first user experience for property listings and client interactions, improving engagement and usability.
- Designed and implemented the **user interface** for **Vendyz**, a freelance **Escrow Transaction Dashboard**, ensuring a fully responsive, intuitive, and secure experience for financial transactions.

- Developed a **Church Management Application** using **React**, creating dynamic and reusable components for membership tracking, event management, and administrative workflows.
- Collaborated with **cross-functional teams** to integrate authentication systems, optimize page performance, and maintain **scalable, maintainable codebases** following best practices.
- Worked in an **Agile development environment**, contributing to feature planning, implementation, testing, and iterative improvements.

06/2024 – 12/2024

Software Developer, Vegeel technology limited
Lagos, Nigeria

- Played a key role in developing a **Cybersecurity Compliance web application** using **React**, ensuring alignment with data security and compliance standards.
- Implemented **secure user authentication workflows**, including **Login, Signup, and Role-Based Access Control (RBAC)** to protect sensitive user data.
- Collaborated closely with **backend developers** to optimize **API integrations and data flow**, reducing API response errors and improving application performance.
- Built a library of **reusable, modular React components**, accelerating feature development and improving long-term code maintainability.
- Conducted **code reviews, debugging, and performance optimizations** to improve application stability and scalability.
- Ensured **responsive and accessible UI design** across multiple devices and browsers, delivering a consistent user experience.

03/2023 – 05/2024

Web developer instructor,
Bafuto institute of information and technology

As a web developer instructor at Bafuto Institute of Information and Technology, I was responsible for mentoring and guiding students in the fundamentals and advanced concepts of web development. I designed and delivered engaging lessons on topics such as HTML, CSS, JavaScript, React, and modern web development practices. Through hands-on projects and interactive sessions, I helped students build real-world applications, ensuring they gained practical experience and a deep understanding of frontend technologies. This role allowed me to share my passion for web development, foster learning, and inspire the next generation of developers.

Education

2024 – Present	BS’c English Language , <i>Lagos State University</i>
2023 – 2024	Software Development , <i>Bafuto institute of Information and technology</i>
2018 – 2023	SSCE , <i>The Gods Will School</i>
