

Samuel Eseigbe - Software Engineer

Software Engineer with a strong track record of building scalable, high-performance web and mobile applications across the full stack. I bring a collaborative mindset to Agile teams, working closely with product and engineering to deliver clean, modular, and maintainable code. Committed to continuous learning, I focus on user-centered design and efficient system performance from crafting intuitive interfaces to contributing to robust backend architecture.

SKILLS

- Languages: TypeScript, JavaScript, C#
- Frontend & Mobile: React, React Native, Next.js, Tailwind CSS, Material UI, Redux, Zustand
- Backend & Databases: Node.js, Express, .NET, ASP.NET Core, PostgreSQL, Supabase, RESTful APIs
- Testing & QA: Automated Testing (Jest, Playwright), Manual Testing, API Testing (Postman, Insomnia), Defect Tracking (Jira)
- DevOps, Tools & Security: Git, GitHub/GitLab PRs, CI/CD, Docker, Vercel, Netlify, Authentication (JWT, OAuth)

WORK EXPERIENCE

Elsoft tech hub

Software Engineer

01/2025 – Present

- Collaborated with a 12 person cross functional team to build ESMA, a school management platform in Next.js, developing interactive dashboards tailored to 4 distinct user roles (parents, students, teachers, school owners) that streamlined academic record access and management.
- Building Diplace, a cross platform real estate mobile app in React Native/Expo, developing map based property search and a mobile first UX aimed at improving listing discoverability and client engagement for the Lagos, Nigeria market.
- Collaborated with product and engineering teams to build and maintain RESTful APIs, running structured API testing in Postman to catch and document defects pre release, contributing to a more stable, production-ready codebase.
- Worked in an Agile environment using Jira for sprint/defect tracking and GitHub pull requests for peer code review, following secure coding practices that supported consistent release quality.

Vegeel technology limited

Frontend Developer Intern

06/2024 – 12/2024

- Contributed to the development of Vegeel, a cybersecurity compliance web application built in React, helping ensure the platform's UI and workflows aligned with data security and compliance standards.
- Implemented secure authentication workflows including login, signup, and Role-Based Access Control (RBAC), to protect sensitive user data and enforce permission boundaries across user roles.
- Collaborated with backend developers to optimize API integrations and data flow, helping reduce API response errors and improve overall application performance.
- Participated in code reviews, debugging, and performance optimization efforts that improved application stability and scalability.

Bafuto institute of information and technology

Web Development Instructor

03/2023 – 05/2024

- Mentored and guided 10+ students through the fundamentals of web development, covering HTML, CSS, JavaScript, and React.
- Designed and delivered a comprehensive curriculum that transitioned students from basic coding concepts to building complex, modern web applications.
- Facilitated hands-on coding sessions and code reviews, ensuring students adopted industry best practices and clean coding standards.

- Increased student project completion rates by implementing interactive, project based learning modules.

PROJECT

Open Canvas Partners

- A secure investor portal built for Open Canvas Partners, a US-based private equity firm. The platform enables investors to explore investment opportunities, review deals and funds, securely access investment documents, manage their profiles, and communicate with administrators. It includes authentication, role-based access control, document management, investor onboarding workflows, and an administrative dashboard for managing investors, funds, and investment opportunities.
- Tech Stack: Next.js, TypeScript, Tailwind CSS, Supabase, PostgreSQL, Drizzle ORM, TanStack Query, TanStack Table, Zustand, shadcn/ui, React Hook Form, Zod

FlexyDemy

- Flexydemy is an educational platform that seamlessly connects tutors and students for online learning. The platform features integrated video calling for live lectures, secure payment processing, and robust file management allowing users to upload and download course materials and documents. Flexydemy provides a complete virtual classroom experience, enabling efficient knowledge transfer between educators and learners in a unified environment.
- Tech Stack: Angular, Tailwind CSS, RxJS, Recharts, WebSockets

ESMA

- ESMA (Elsoft School Management Application) is a comprehensive web-based solution designed to streamline school administration. The platform centralizes all academic operations, enabling schools to efficiently manage student records, attendance, grades, schedules, and faculty information. ESMA simplifies administrative workflows and provides a unified system for handling the complete spectrum of academic affairs
- Tech Stack: Next.js, Tailwind CSS, shadcn/ui, Zustand, TanStack Query, TanStack Table, Recharts, WebSockets

XP Requirer

- XP Requirer is a comprehensive healthcare ecosystem platform that connects patients, doctors, hospitals, and investors in a unified network. The platform facilitates telemedicine consultations, secure payment processing, medical document management, and healthcare investment opportunities. XP Requirer creates a complete digital health infrastructure that streamlines patient care delivery while enabling strategic financial partnerships in the medical sector.
- Tech Stack: React, Framer Motion, Tailwind CSS, Axios, Redux

Veegel

- Veegel is a comprehensive cybersecurity compliance platform that helps organizations manage and monitor their security posture. The application streamlines compliance workflows, automates security assessments, and provides real-time insights into regulatory requirements. Veegel enables businesses to maintain adherence to industry standards while reducing compliance overhead through intelligent automation and centralized security management.
- Tech Stack: React, Tailwind CSS, Axios, Redux, Framer Motion

EDUCATION

BAFUTO Institute of Management Information Technology

Software Development

2023 – 2024

Lagos State University

Bachelor of Arts in English Language - 4.40 GPA

2024 –Present
